

CLARICE LANDMAN-MONTANO

Bloomington, IN | (505) 639-3430 | landmanclarice@gmail.com | [linkedin.com/in/clarice-l-m](https://www.linkedin.com/in/clarice-l-m) | github.com/Clarice-data

PROFESSIONAL SUMMARY

I have several years of experience in dental practice operations, including staff supervision, billing, accounts receivable, scheduling, HR tasks, and systems implementation. Alongside that work, I'm earning an A.S. in Data Science Technology and building hands-on skills in Python, SQL, data warehousing, web development, and version control. My background sits at the intersection of operations, process improvement, systems, and technical problem solving.

PROFESSIONAL EXPERIENCE

Dental Office Manager — Bloom Dental

Bloomington, IN | Jun 2026 – Present

- Manage daily operations for a two-doctor, two-hygienist practice within a DSO, including staff supervision and scheduling.
- Handle billing and accounts receivable, HR tasks like onboarding, vendor relationships, and patient records.

Treatment Coordinator — Distinctive Dentistry

Jacksonville, FL | Sep 2023 – Feb 2026

- Ran front-office and patient-flow operations for a multi-provider practice, handling scheduling, follow-up communication, and task tracking.
- Reworked data-entry and billing steps that had been causing errors, which helped accounts receivable turnaround.
- Was the main point of contact for 150+ client interactions a week and trained new hires on office systems and procedures.

Business Assistant — Heartland Dental

Jacksonville, FL | Jan 2023 – Sep 2023

- Handled accounts receivable, built tracking improvements that cut down on billing discrepancies, and processed a high volume of daily transactions and records across a multi-office setup.

Patient Coordinator — Mountain View Family Dentistry

Rio Rancho, NM | Mar 2021 – Jul 2022

- Handled patient scheduling, records management, and insurance verification while keeping to strict confidentiality standards.
- Helped roll out new technology tools and worked on documentation to keep data better organized.

Kiosk Supervisor — Korn Patch Kettle Korn

Albuquerque, NM | Sep 2019 – Mar 2021

- Ran daily operations for a retail kiosk, including team scheduling, task delegation, financial transactions, and sales reporting.

EDUCATION

A.S., Data Science Technology — Florida State College at Jacksonville (FSCJ)

Aug 2024 – Expected Aug 2027

Relevant coursework: Programming in Python, Data Warehousing, SQL Server, Web Technologies, Statistics, Spreadsheets/Data Analysis, Dimensional Modeling, Database Concepts

General Education — Central New Mexico Community College

2013 – 2015

FEATURED PROJECT

Landman Advisory Solutions — github.com/Clarice-data/landman-advisory-solutions

- Developed a multi-page consulting website centered on dental operations, compliance, and practice systems.
- Developed service content around HIPAA training, PCI readiness, SOP development, software transitions, contingency planning, and process improvement.
- Planned the site structure, service offerings, branding, and user flow, then built and published the site using HTML and CSS.
- Expanded the project through the Landman Advisory Solutions Substack, writing about process design, shared workflows, and operational consistency.

TECHNICAL COURSEWORK & APPLIED LEARNING

Python Programming

- Coursework progressed from foundational computing concepts (github.com/Clarice-data/cop1000c-intro-computing) into Python labs covering variables, conditionals, loops, functions, lists, dictionaries, file handling, and CSV/TSV processing.
- Worked with NumPy for array creation, indexing, slicing, reshaping, aggregation, sorting, Boolean masking, and broadcasting.

Data Warehousing & SQL

- Designed dimensional data warehouse structures using fact, dimension, and bridge tables, applying star schema and ETL concepts and comparing them against transactional database design.
- Wrote SQL queries for reporting and relational database practice, maintained in a public SQL portfolio (github.com/Clarice-data/sql-portfolio).

Web Technologies

- Built and published several HTML5/CSS course sites through FSCJ student hosting, working with page structure, forms, responsive layout, and typography.

Git, GitHub & GitHub Pages

- Used Git from the command line and standard GitHub workflows (branches, collaborators, remote push, clone) across coursework repositories, and maintain an organized public GitHub profile (github.com/Clarice-data).

Statistics, Data Analysis & Spreadsheets

- Completed college-level statistics coursework (github.com/Clarice-data/sta2023-elementary-statistics) and spreadsheet coursework in data organization, formulas, and structured analysis (github.com/Clarice-data/cgs2512c-spreadsheet-concepts).

Technical Documentation & Compliance

- Compiled personal study notes on PCI DSS concepts as part of independent research into security and compliance documentation (github.com/Clarice-data/pci-dss-notes); this reflects self-directed study, not formal certification.

TECHNICAL SKILLS

Programming & Data: Python · NumPy · SQL · Data Analysis Concepts

Databases & Data Warehousing: SQL Server · Dimensional Modeling · Star Schemas · Fact & Dimension Tables · ETL Concepts

Web: HTML5 · CSS · Responsive Web Design

Development & Version Control: Git · GitHub · GitHub Pages · VS Code

Business & Productivity: Microsoft Office · Google Workspace · Records Management

ADDITIONAL ACADEMIC & TECHNICAL PROJECTS

Data Warehousing & SQL

- Designed a dimensional data warehouse using fact, dimension, and bridge tables (FactSales, SalesReason bridge), wrote SQL queries for reporting, and completed SSIS/data-flow exercises comparing transactional and warehouse structures.

Python & NumPy Coursework — github.com/Clarice-data/COP2034CC9Repo

- Built Python programs across multiple labs using functions, loops, dictionaries, file processing, and CSV/TSV data, then used NumPy for array work and versioned the projects through Git and GitHub.

GitHub Pages Portfolio — clarice-data.github.io/PagesWorkshop

- Forked a repository to build a personal portfolio site, configured GitHub Pages from the main branch, edited it locally in VS Code, and added a downloadable resume link.
